

PRECIOUS AJAYI

Writer, Researcher and Strategic Operator

Nigeria · 091 3162 3617 · preciousayomide147@gmail.com · LinkedIn

Profile

I turn complex evidence into clear publications, stakeholder maps and outreach systems that help important work reach the right people. My work spans research synthesis, institutional editorial strategy, grant writing, executive coordination and personalised outreach, grounded in original analytical frameworks that connect behavioural evidence to practical communications. I hold a B.Ag. in Agricultural Administration from the Federal University of Agriculture, Abeokuta.

Professional Experience

Executive Assistant & Brand Manager · Dutum Company Limited · 2025 – Present

Status: Active professional work

- Operating as EA and Brand Manager for the Managing Director of an infrastructure company, managing editorial, administrative and strategic coordination across the organisation.
- Produced research-led infrastructure and project-bankability content, including a published LinkedIn article on orphan risks and infrastructure financing bankability.
- Managed executive writing, manuscript editing, speaking-opportunity pipelines and correspondence workflows.
- Coordinated website and vendor operations, payment automation processes, and weekly reporting rhythms.
- Critiqued and edited the MD's book manuscript (~27,500 words, 9 chapters), conducting an authenticity and AI-detection review of flagged passages.
- Designed operational documents including a COI Protocol, Working Bible, Weekly Synthesis Report and Social Content Engine.
- Separated and maintained distinct editorial identities for the parent company, its subsidiary brand and the MD's individual presence.

Grant Writer · Limpiar · March 2025 – April 2025

Status: Completed and measured

- Wrote thirteen tailored grant proposals in a five-week window, adapting project narratives to funder priorities across multiple opportunities.
- Thirteen tailored proposals produced; more than \$30,000 in approvals.
- Conducted funder and opportunity research, eligibility screening and narrative adaptation for each application.
- Managed end-to-end application processes with full compliance across all deadlines and documentation requirements.

- Created post-award reports and presentations communicating fund utilisation and project outcomes to stakeholders.
- Collaborated with programme, finance and operations teams to gather data and refine proposals.

Content Team Lead · Aroba Animations · February 2022 – May 2022

Status: Completed and reported

- Coordinated content during a product and film launch period, leading social media strategy and team collaboration.
- Curated and optimised the brand's social media content across channels during a product and film launch.
- Reported 200% Instagram traffic growth during the launch period.
- Collaborated with team members on launch coordination and audience engagement that contributed to ticket sales.

Note: "Reported" reflects original platform analytics; independent verification of the source data has not been conducted.

Independent Client Work · August 2023 – Present

Status: Active professional work

- Freelance writing, content strategy and virtual assistance across diverse clients and industries.
- Produced editorial, strategic and ghost-writing work across multiple industries for a sustained client base.
- Architected tailored content strategies for clients, including brand strategy briefs, SOPs and professional CVs
- Built an automated project tracking system to manage workflow across concurrent engagements.

Independent Research & Analytical Work

PiggyVest: From 26,000 Savings Responses to a Behavioural Decision System

Status: Completed independent analytical system

- Analysed PiggyVest's 2025 Savings Report, covering more than 26,000 respondents across 12 states, six geopolitical zones and different settlement types, and developed an original strategic framework.
- Reframed financial behaviour as movement between probabilistic states rather than a linear marketing funnel.
- Developed a five-state belief-transition architecture (Unaware → Aware → Considering → Active Saver → Lapsed/Churned) with a lapse and decay path.
- Built a two-axis diagnostic combining product relationship and financial maturity.
- Developed eight constraint archetypes grounded in the dataset's evidence.
- Connected the model to language, legitimacy, trust, timing and social context as decision variables.

- Produced a methodological defence brief and a claims-verification system covering provenance, definition, population, period, calculation and inference.
- Built a four-arm 30/60/90-day experimental plan.
- Converted the analysis into campaign and intervention concepts, including the “All at Once” campaign (currently in design phase — see below).

The Shape of Choice: Engineering Decision Spaces

Status: Completed and published intellectual work

- A 96-page, ten-chapter applied-analysis book, independently published and typeset in LaTeX (XCharter/Avant Garde typography, TikZ diagrams, 6×9 format).
- Synthesises constrained choice, Markov processes, topology, fixed points, information capacity, dominance, impossibility and binding constraints into a unified framework for treating strategic propositions as falsifiable and evidence-graded.
- Applies microeconomic theory (Eliaz–Spiegler, Manzini–Mariotti, Masatlioglu attention models) to marketing as constraint engineering.
- Uses four-stratum evidence grading system and Nigerian case studies throughout.
- Framework subsequently applied in the PiggyVest analysis and Cowrywise audit (below).
- Published and available for purchase; not peer-reviewed.

PL-5: A Connected Library of Strategic Principles

Status: Developed architecture; flagship essay published

- A 50-principle research architecture applying mathematical and theoretical frameworks to consumer behaviour, with a master sequence spanning July 2026 to December 2027.
- Flagship essay: a 6,500-word Markov chain paper reframing consumer belief as probabilistic states, published and sold through Selar.
- Principles include Percolation Theory, Catastrophe Theory, Optimal Transport, Braess Paradox, Kolmogorov Complexity, Shannon Channel Capacity, Gödel's Incompleteness Theorems, Lyapunov Stability, Stable Marriage/Gale-Shapley, among others — each applied to institutional and consumer problems.

Reverse-Engineering Three Years of Cowrywise Editorial and Behavioural Strategy

Status: Completed independent strategic research; not commissioned by Cowrywise

- An independent audit reconstructing Cowrywise's implicit behavioural operating system from three years of public evidence, using The Shape of Choice as the analytical engine.
- Examined a corpus of articles and content, classifying by topic, audience, behavioural function and product relationship.
- Compared Cowrywise's editorial approach with PiggyVest's data-led storytelling to identify structural differences.
- Covered products including Streaks/Streakonomics, Direct Debit, Money Duo, Managed Portfolios and Triggers.
- Identified editorial gaps, audience-state analysis and campaign concepts derived from the research.

- Mapped competitors defined as behaviours (ajo, esusu, cash, crypto, real estate) rather than companies alone.

What this proves: Ability to study a publication's archive, identify recurring intellectual structures and connect content to specific audiences and institutional goals.

Writing

Analytical and Research Writing

- The Shape of Choice: Engineering Decision Spaces: 96-page applied-analysis book (published).
- PiggyVest Financial Life Intelligence System: strategic analysis and behavioural decision architecture.
- Markov Marketing: 6,500-word essay on consumer belief as probabilistic states (published and sold through Selar).
- Cowrywise Editorial and Behavioural Audit: independent three-year editorial strategy analysis.
- Selected PL-5 essays applying mathematical frameworks to institutional and consumer problems.

Editorial and Personal Essays

- Bobo, You Finally Finished NYSC: published on Ebbs and Flow (Substack), May 2026.
- Great Friend, Horrible Lover: published on Ebbs and Flow (Substack), May 2026.
- Confessional-analytical register blending warmth, self-awareness and philosophical observation.

Institutional Writing

- Infrastructure and project-bankability commentary for Dutum Company Limited.
- Executive ghostwriting for the Managing Director of an infrastructure company.
- Grant narrative excerpts (redacted) from the Limpiar engagement.
- Strategic brand foundation briefs for real estate and consumer clients.

Education

B.Ag. in Agricultural Administration · Federal University of Agriculture, Abeokuta, Ogun · September 2024

Skills

Research synthesis and quantitative abstraction · Grant writing and funder research · Editorial strategy and content architecture · Virtual assistance and executive coordination · Social media strategy and audience growth · Behavioural and constraint analysis · LaTeX typesetting · Project tracking and CRM design
